

Weekend Mouse Check

Kreed Lab — Guidelines

Coverage Policy

If you cannot cover a weekend mouse check that you have been assigned, it is your responsibility to find a replacement before that weekend. Do not leave a check uncovered.

Rooms to Check

Room 9273 — Reverse Light Cycle Room. Full welfare check required

Rooms 9234 & 9213 — Isolation Rooms. Check for green surgery cards only.

Note: Cages with yellow Special Care cards are maintained by the assigned researcher. If you have any issues, please contact them. (e.g., FEDs, HFD, special water).

Room 9273 — Reverse Light Cycle Room

This room requires a full welfare check on every visit. Work through the following:

- 1. Food & Water** — Check every cage. Top off the food if the hopper is low. Replace water bottles if empty or nearly empty.
- 2. Health Check** — Inspect all mice for fight wounds, unusual posture, labored breathing, or any other signs of distress. If you find a sick or injured mouse, follow the standard health concern protocol and notify the responsible lab member.
- 3. Surgery Cards** — Fill out green surgery cards for any post-op mice, noting the date and any relevant observations.
- 4. Room Log** — Find the clipboard on the wall in the behavior suite. Record the total number of cages, room temperature, and humidity for that day.

Rooms 9234 & 9213 — Isolation Rooms

These rooms require a lighter check. You are not responsible for routine husbandry in the isolation rooms:

- 1. Surgery Cards** — Look through the cages for any green surgery cards. Fill them out with the date and any relevant observations for post-op mice.
- 2. Special Care Cards** — Cages marked with yellow Special Care cards are actively maintained by the assigned researcher. If something looks seriously wrong, notify the responsible lab member. If you cannot reach them, use your best judgment on how to proceed. Mouse welfare is the top priority.
